

**Correspondence to Referees of the manuscript #QNUJS-B2427 entitled:
“An alternative equivalent condition for a finite family of normal matrices
to be simultaneously diagonalizable via congruence”**

Authors: Vo Duc Tu Duy, Le Thanh Hieu

The authors would like to acknowledge the editors for their attention and consideration of the authors' works. They also thank the referees for their time in reading our manuscript.

According to the editors' email informing the referees' reports, the referees accept our manuscript without revision.

After carefully rereading our manuscript, we think that it has been adapted to the QNUJS rules. Hence, we have resubmitted this old version of our manuscript. In addition, if you need any additional information, we will respond to you.

Once again, thank you very much for your time and your consideration.

Yours sincerely,

Le Thanh Hieu,

Department of Mathematics and Statistics,

Quy Nhon University, Vietnam.
